Health Overview and Scrutiny Commission CCG Update September 2018

Erica Daley
Director of Integrated Commissioning

Introduction

- Estates Review
- Primary Care update
- Jean Bishop Integrated Care Centre
- Community Paediatrics

Estates review

Overview

- Citycare, via Community Healthcare Partnerships and on behalf the CCG, undertaking a strategic estate review of the health estate within the NHS Hull CCG area to provide an update on the 2015 Hull CCG Estate Plan and produce a revised Hull Health Estates Strategy
- The Strategy will align and direct estate infrastructure decisions to support the local Health and Care Place Plan and provide a coherent strategy that aligns with and supports the Humber Coast and Vale STP plans
- The purpose of the Strategy is to determine the future requirements for the next 5 years of estate planning and proposed solutions to enable the most efficient estate response for the long-term, in line with clinical service strategies and in keeping with the drive towards making best use of assets.
- The Strategy does not purely focus on estates but does consider the correct distribution of accommodation for services relative to the service demand.
- This will ensure that investment in premises and accommodation align with prioritisation of service transformation and the accommodation becomes an enabler in supporting delivery of Hull's health and care models

Progress and Next Steps

- A review and analysis of the current primary and community health care estate in Hull against the CCG's Service strategies and future need will identify a list of proposed properties for retention, disposal, and potential subject to further feasibility studies
- Gap analysis of the future accommodation requirements against the proposed retentions and disposals will identify all key estate requirements and associated project work streams required to meet the future clinical capacity need for the area.
- This will be formed into a series of options to be appraised to determine the advised preferred and secondary options
- Options will be subject to public consultation depending on services affected
- A draft of the Strategy will be considered by the CCG in late September prior to wider circulation

Practice Collaborative Working – Local Quality Schemes

A new scheme has been added which focusses on patient follow up within Primary Care once seen in the ICC

International GP Recruitment

Scheme progressing well and ahead of the national programme. Hull is holding a taster weekend last week in September. Current expectation is that 5 candidates will come over from Spain

Extended Access

Procurement process complete , contract awarded to City Health Care Partnership (CIC) operating as Hull Primary Care Collaborative in partnership with 4 of Hulls GP groupings

Service commencement is contracted to start on 1 October 2018

What extended access means for patients

Extended Access service (Extended Access to Primary Care Medical Services) will commence 1st October 2018

- Appointments will be available Monday to Friday 6.30pm to 8pm with additional availability on a weekend
- An additional 149.5 hours of appointments per week will be available across the city to see a Health Care Professional
- Appointments can be booked via the patients usual GP practice or a dedicated phone line that covers the whole service
- A triage system will be in place to ensure that the patient is seen by the right person, first time
- Appointments will be available with a wide range of Health Care Professionals including GPs, Advanced Nurse Practitioners, Practice Nurses, Health Care Assistants etc
- The service will be delivered from a minimum of 4 locations
- Once consent has been obtained from the patient, the service will be able to access the patients full clinical record
- The service is an extension of the usual primary care medical services
- The service will be widely advertised and will have a dedicated website
- This is not a walk-in service and patients will need to have an appointment

GP Practices

GP Practices are now working as part of larger groupings and can provide patients with a wider range of services.

Jean Bishop ICC

success not just a building

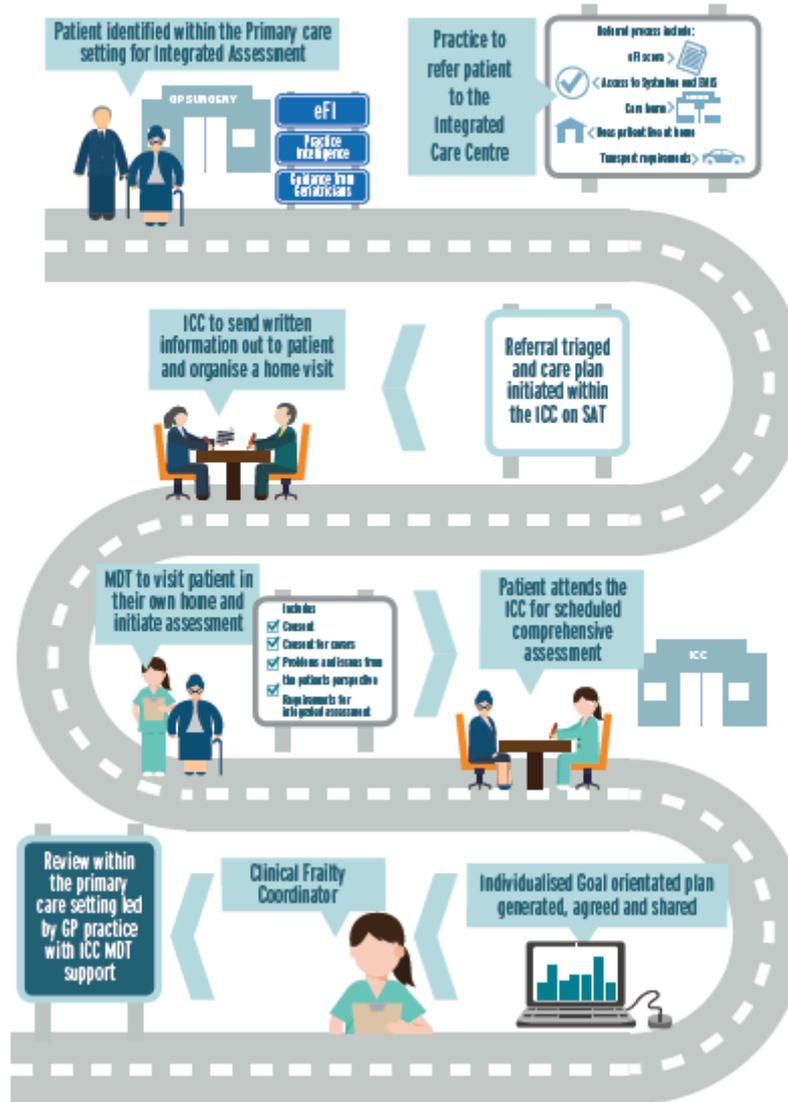

- Benefits realisation based on converting unplanned/emergency to scheduled planned care
- To date an average saving of £171.50 per patient per year has been made from medication reviews
- Early identification of need results in better patient and carer outcomes
- Investing time now saves time later
- Integration is reducing duplication – up to 8 interventions in one appointment at ICC
- Pathway redesign principles applicable much wider than frailty

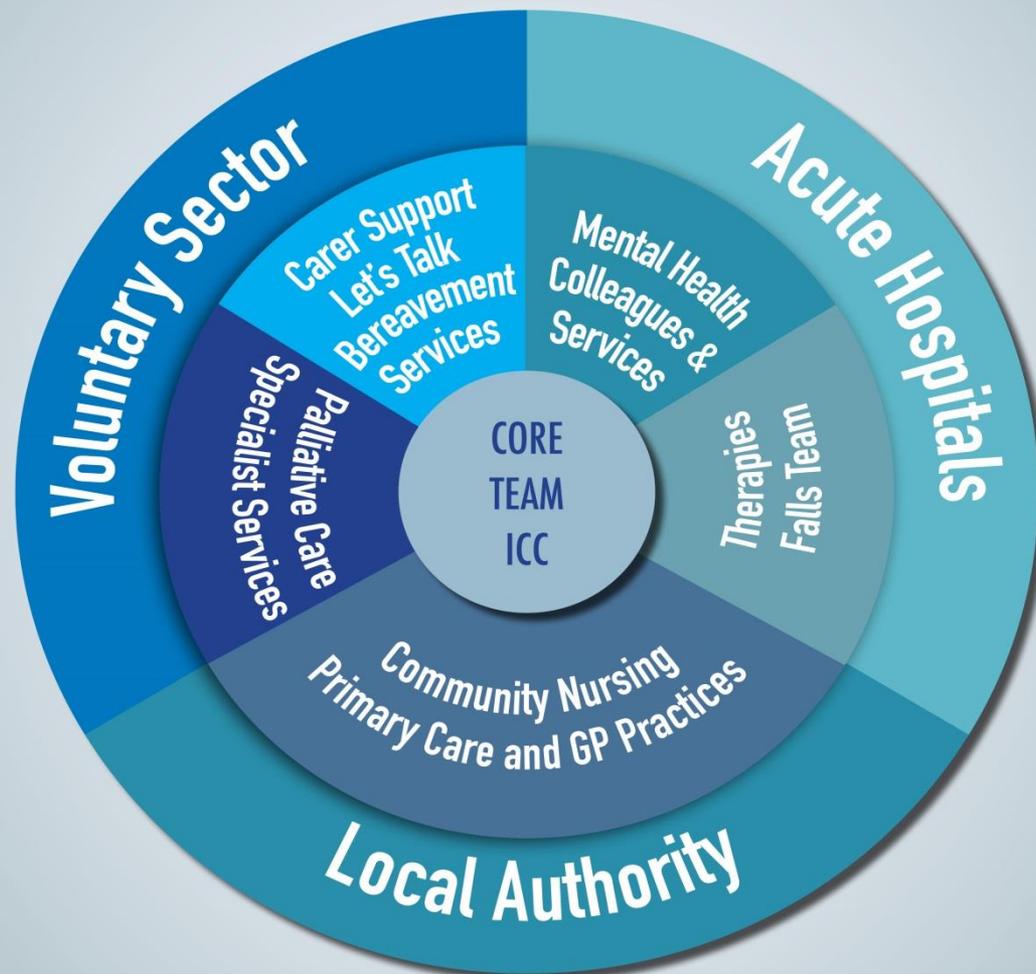

Jean Bishop ICC

- Assessment area operational 8-10 patients a day referred by primary care
- Each patient receives up to 10 interventions in one visit, care followed up by care coordinator in community
- 25 patients a week receiving outreach MDT care in care homes
- Introducing phase 2 – respiratory, rehabilitation , dementia and Parkinson's

Pathway for access to the Integrated care Centre (phase1)

THE WIDER INTEGRATED CARE CENTRE INTERFACE

- Plan to review community paediatric services
- Services include medical, nursing and therapy services
- Provided across hospital and community care
- Workforce issues and increasing demand
- Need to take a new approach across Hull & East Riding
- Stakeholder event planned for October to commence plan to develop an integrated system approach
